

# Mi Tailoring – WordPress Advance Plugin

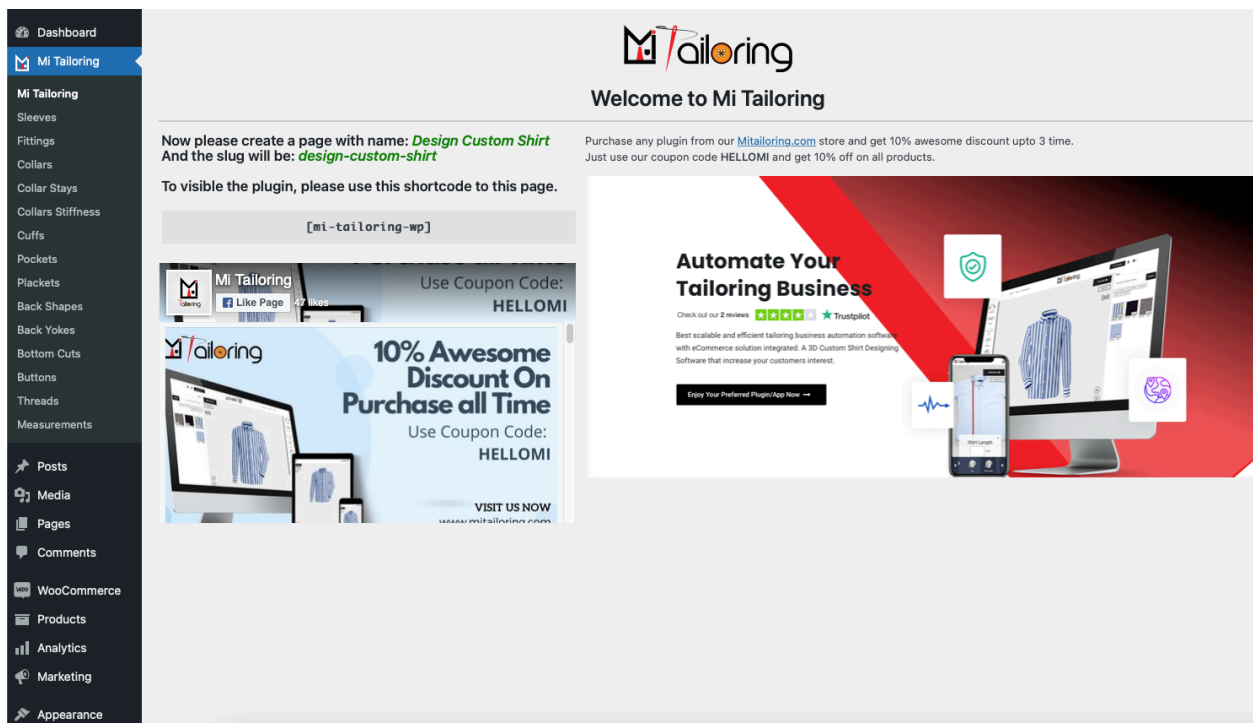

## Installation and Setup Instruction

### Dependencies:

1. WordPress 5.X
2. PHP 7.2 – 7.X
3. MySql 5X
4. WooCommerce

### Installation Process:

1. Unzip the file
2. Upload **wp-mi-tailoring.zip** file to your WordPress plugins section
3. After Successful Installation Create a page with name: *Design Custom Shirt*
4. Must use the page slug: *design-custom-shirt*
5. Now on this page add this shortcode: **[mi-tailoring-wp]**. This shortcode will appear the plugin to the frontend.

After setup plugin screen

## Setup Process:

There must be installed WooCommerce Plugin first. As mi tailoring working dependently on WooCommerce. After installing the plugin, there's a menu will be visible in the wp-admin menu called Mi Tailoring. There need to setup all the items of the plugin. There are different sections of the plugin,

1. Sleeves
2. Fittings
3. Collars
4. Collar Stays
5. Collar Stiffness
6. Cuffs
7. Pockets
8. Plackets
9. Back Shapes
10. Back Yokes
11. Bottom Cuts
12. Buttons
13. Threads
14. Measurements

So, before trying to add fabrics there need to setup those settings. Otherwise, the options in fabric upload will not be visible.

## Sleeve Setup

To setup sleeve there need to go to the sleeves page from Mi Tailoring menu. Now just add the sleeve title and add image from the demo data folder. Here's another field is required, which confirms that cuff will show on this sleeve or not. Just simply choose Yes/No from Show Cuff field and upload.

## Bottom Cuts Setup

As following the Back Shape Setup process.

**Bottom Cuts** Screen Options ▼

**Add New Bottom Cut**

**Name**  
The name is how it appears on your site.

**Slug**  
The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

**Description**  
The description is not prominent by default; however, some themes may show it.

**Upload and Image**  
 [Upload an Image](#)

[Add New Bottom Cut](#)

<input type="checkbox"/> Name	Thumbnail	Description	Slug	Count
<input type="checkbox"/> Classic		—	classic	0
<input type="checkbox"/> Modern		—	modern	0

**Bulk actions ▼** [Apply](#) 2 items

**Bulk actions ▼** [Apply](#) 2 items

## Buttons Setup

Buttons setup is some different from other setups. It's post type and it will be working as like posts or products. But with some custom fields from previous setup.

**Buttons** [Add New](#) Screen Options ▼

**All (2) | Published (2)**

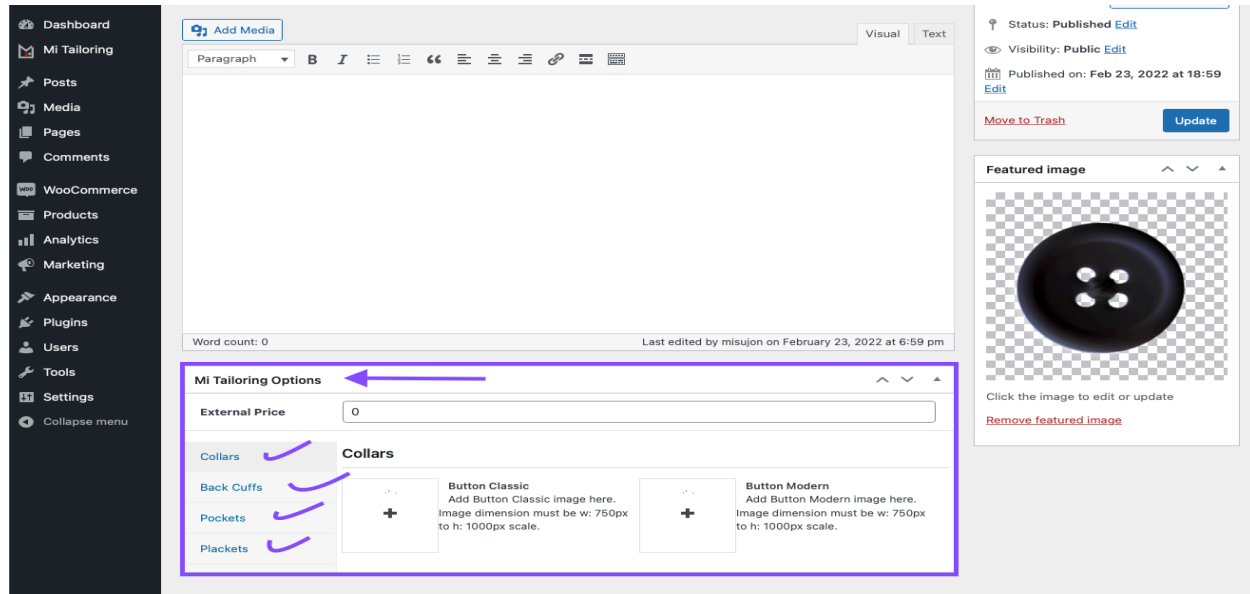

**Bulk actions ▼** [Apply](#) **All dates ▼** [Filter](#) 2 items

<input type="checkbox"/> Title	Date
<input type="checkbox"/> Black	Published 2022/02/23 at 6:59 pm
<input type="checkbox"/> White	Published 2022/02/23 at 6:51 pm

**Bulk actions ▼** [Apply](#) 2 items

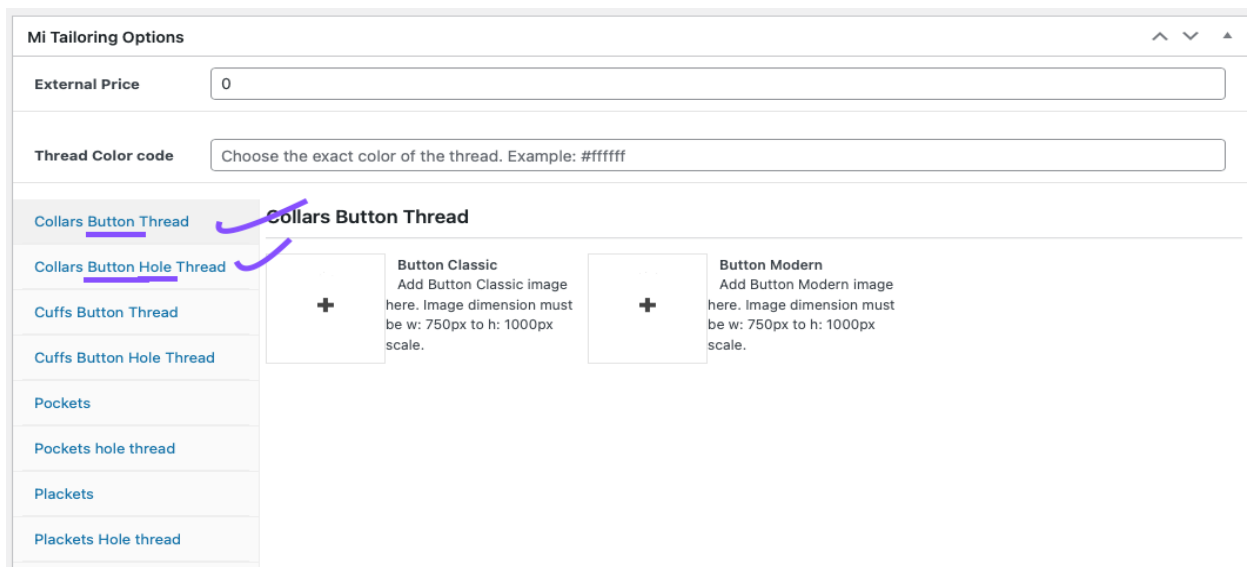

On the adding button option there will be visible some options from the previous setup. Those are showing by measuring where the buttons will be added or not. And there you need to add buttons where the button will be available. If no button for a field, just keep it as it is. That can be replace later also. You can also show the additional price for button to your customers.

## Threads Setup

Threads setup also as like button setup. But as threads are visible above and under a button, So, there's need to add the threads for button hole and button thread. And another field is thread color code. The color code will work while a customer trying to choose color for his/her embroidery color.

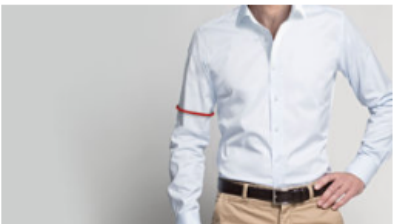

## Measurements Setup

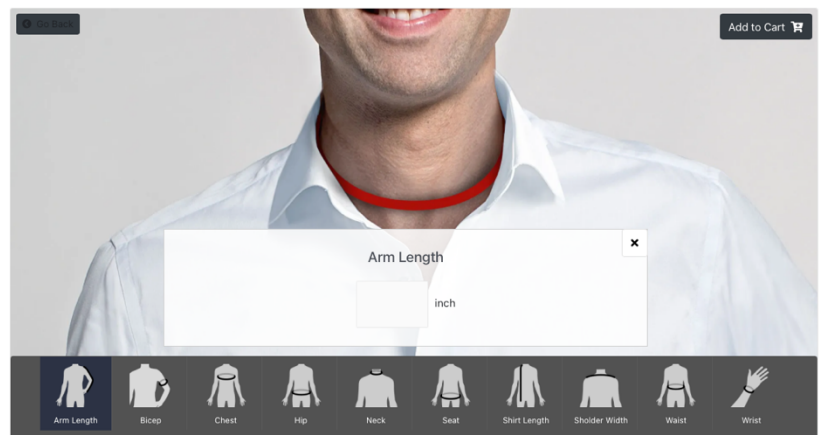

Measurement setup is a really easy process. Only need to add the title and its icon and featured image. Which will show to the customers when they will try to add their measurement in the time of ordering. There's another field called measurement video URL. If you want to add a video instead of the image, then just add a video URL and it will be showing in the customer end. Which will increase more customer engagement to your website.

**Measurement Icon** ^ v ▲

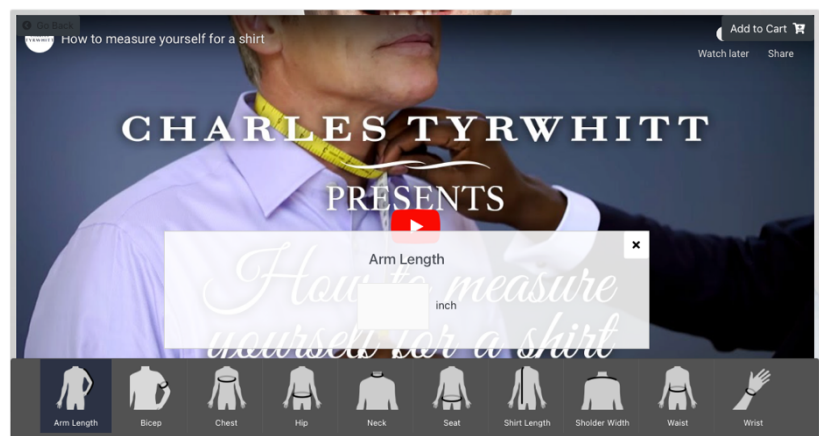

**Measurement Video Url** ^ v ▲

**Featured image** ^ v ▲  
  
Click the image to edit or update  
[Remove featured image](#)

*Adding measurement background image and icon from wp-admin*

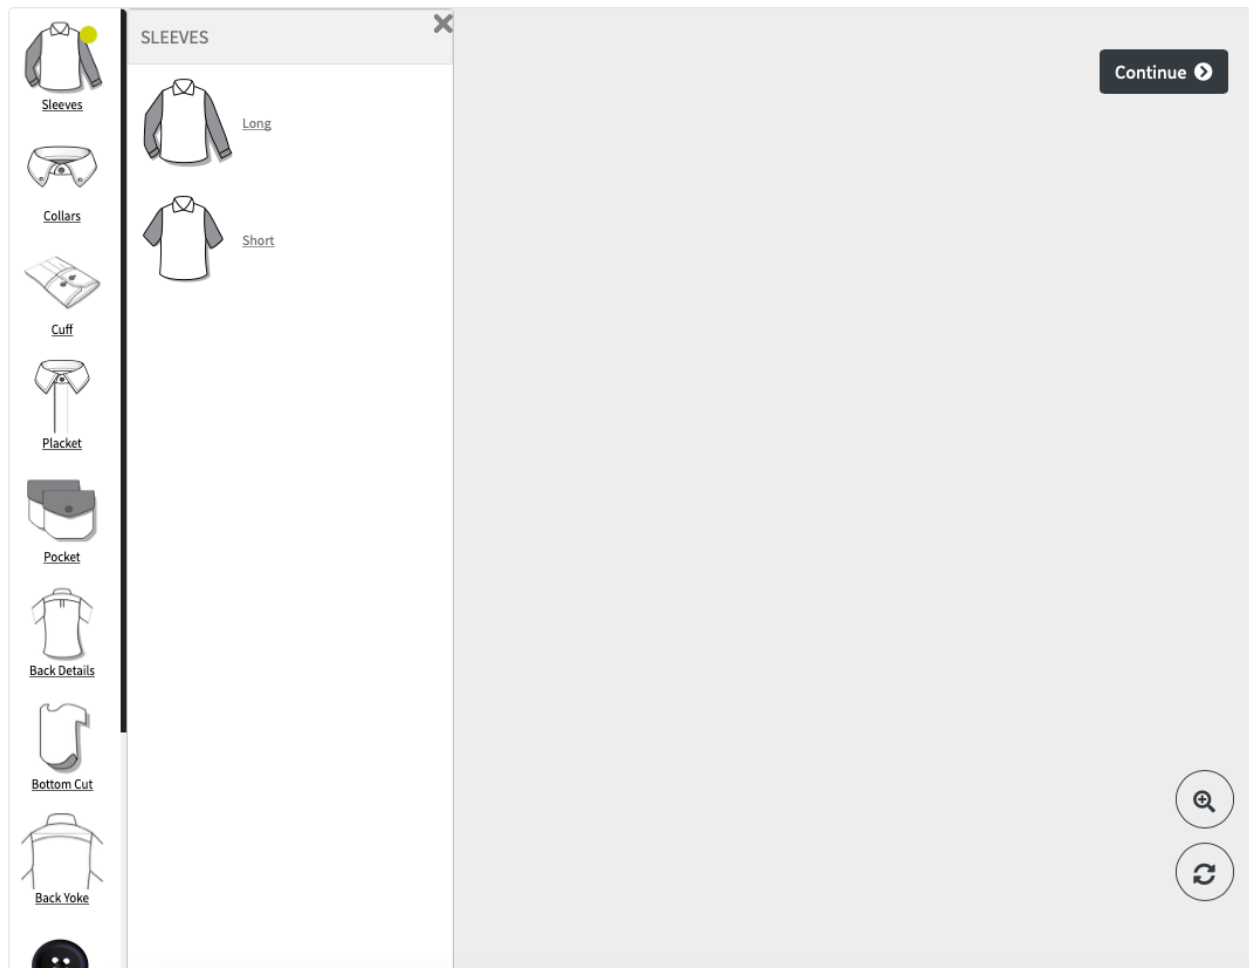

*Showing the background image and icon in the customer end*

*Video showing in customer measurement if video added from the wp-admin*

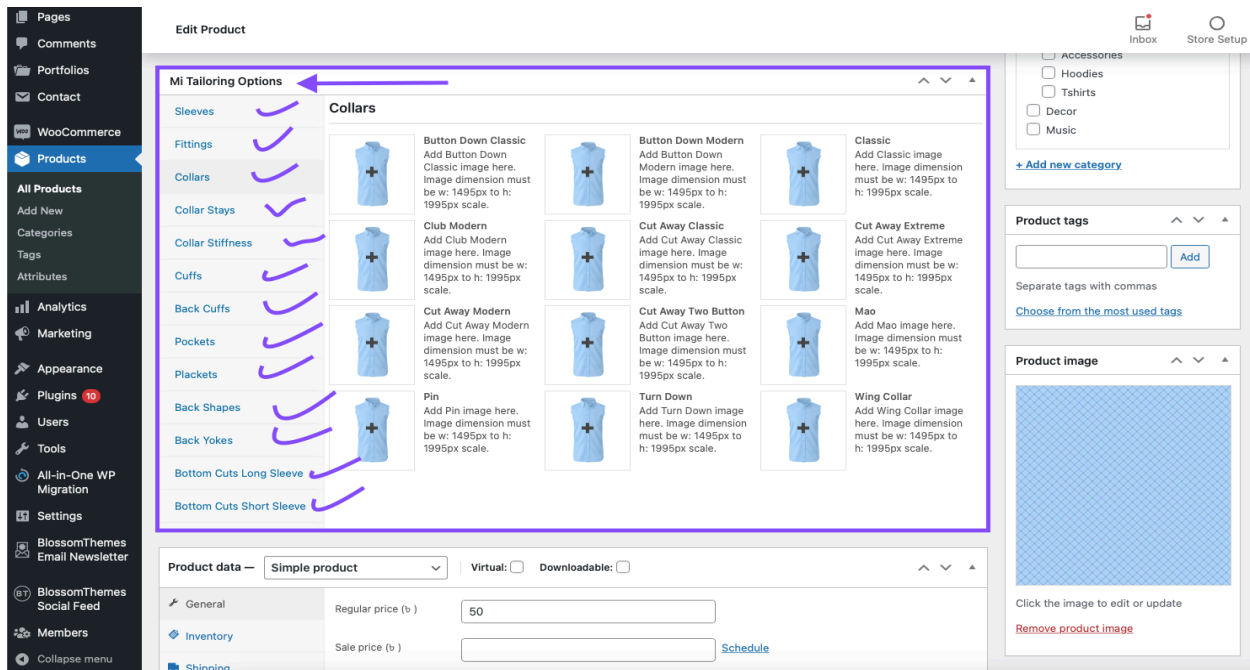

After completing uploading of all the sections and buttons, threads and measurement. The customer end will be showing the menus which will be like that.

But there's no model showing for the fabric shape. As because we don't add any fabric yet. So, now let's go to setup fabrics first.

## Fabric Setup Process

To add a fabric, we need to go to **Products -> Add Product**. Now here you can add a product as it is. But there's another section called **Mi Tailoring Option**, which comes from our plugin options. And there you will find all those options you added before in our plugin end. That means there you will find the Sleeves, Fittings, Collars, Pockets, Plackets etc.

And here you need to upload the fabric different parts as well by following and reading the instructions. If there's any image is missing for any field, Just leave it as it is and upload others. After adding all the options just click save/publish and you will see the customer end result like below.

# Setup Process Finished
